

*A note from the Director of Nursing Services*

It's been a privilege to serve as the Director of Nursing Services here at LICC Flushing NY. Dedication and teamwork have been the key ingredients to what we do here and we happen to be successful at it. Our approach to delivering care is a continued effort. We are passionate about delivering the highest standard of excellence in what we do best.

The staff at Long Island Care Center strive for excellence as our Vision statement states, "To provide to our community, in a caring and professional manner along with the full gamut of medical, rehabilitation and ancillary services to fill the gap between the hospital and the physician's office."

We are motivated and inspired to see our patients' victoriously overcome difficult challenges that brought them to us in the first place, with the tenderness and caring hearts of the entire team we are proud to say we always deliver with compassion and care. We ask you to come and experience the difference at LICC, once you are here your lives will change for the better and our staff will make sure it remains that way. We welcome you to experience the difference!

Respectfully,

Sharon Smikle  
Director of Nursing Services  
Long Island Care Center.
